

Caithness-Moray HVDC Grid Integration Knowledge Sharing Event

The National HVDC Centre together with Scottish Hydro Electric Transmission, are hosting this event to share the experience and lessons learnt from integrating the Caithness-Moray (CM) HVDC Link into the (electrically weak) North of Scotland electricity grid; focusing specifically on the control challenges and learnings.

Venue	The National HVDC Centre, 11 Auchindoun Way, Wardpark, Cumbernauld, G68 0FQ
Date/Time	Thursday 28 th March 2019 / 10:00-15:00
Audience	This event is intended to be particularly relevant to the developers of HVDC projects, along with Transmission Owners, System Operators, and interconnector developers. It may also be of interest to: academia, HVDC suppliers and consultants.

Agenda

The event will comprise separate sessions on the control challenges and learnings at each stage of the project:

- Investment Planning
- Specification & Procurement
- Detailed Design
- Project Delivery
- Factory System Testing
- Commissioning
- Recommendations & Conclusions

Notes

- This event is free to attend, and lunch will be provided, however places are limited.
- The sessions focus on the HVDC control challenges and, whilst there will be an overview of project delivery/construction, it is not intended to cover: plant, civils, cables etc. in detail.
- **Details on how to register can be found on: hvdccentre.com**
